NEWS FROM THE MADDEN DISTRICT

The Madden district was pleased to hear good reports on Mrs. E. J. Stafford's condition after an operation at Holy Cross hospital, Calgary. The community wish her a speedy recovery.

The Ladies Club held a sale and auction October 24, in the Madden hall. The wish to express their appreciation to all who helped make it a success. To Mr. Wm. Murdoch a special thank you for auctioneering.

The C.G.I.T. of Madden will have a sale of sewing November 14 in the Madden hall.

Snow and rain have halted threshing operations in this district since

Mr. and Mrs. Wm. Kiel left Thursday to visit Washington. Mr. Kiel's father hasn't been in good health for some time.

LOCAL NEWS

Mr. and Mrs. John Carpenter loaded their belongings on Wednesday and moved to Winnipeg.

A. W. Gordon has moved his office into the Bill's Sales and Service premises in the Brick garage.

Mr. and Mrs. John Carpenter loaded their belongings on Wednesday and moved to Winnipeg.

Ed. Meyers left on Thursday morning on a trip to Montana, visiting some of his relatives.

Marie Hatten came in from the country to work as relief waitress at the Home Cafe.

Mr. and Mrs. Mark Cameron have purchased a dwelling in Calgary and intend to move there shortly.

Miss Lois Gordon left last weekend to take a course at a business college in Calgary.

Mrs. W. (Sally) Walker is spending a few days this week visiting her relatives at Medicine Hat.

Mike Charney had a successful big game hunt in this district north of Edmonton and returned with two moose, two bear and a deer.

Jock Thompson has taken on the job of caretaker of the skating rink and is now at work getting in shape to flop.

Mrs. Calhoun is laid up with a broken bone in her ankle, which she sustained when she slipped and fell a few days ago.

Keep in mind the annual bazaar of the Women's Guild of the Anglican church, to be held in the Co-op hall on Saturday, November 26th.

Walte Landry and Stanley Price left on Sunday morning by bus for a sightseeing tour to Los Angeles and Long Beach, California and other points enroute.

OLD TIMERS A MESSAGE TO

Dear Old Timers:

One more November has rolled around提醒 us that there is just time to get our cow hands busy roundin' up the Old Timers.

As usual we want our hearts in the big corral on the last Wednesday of November which is the 26th.

The executive has the same Old Timers orchestra "The Mountaineers" booked for the occasion and also an entertainment program underway. The dance and program will be in the U.P.A. hall following our banquet which is being sponsored by the Ladies Aid of the United church and which will be served in the church.

We are very proud that the banquet is in such capable hands as it means a "super supper" of chicken and turkey with all the trimmings.

Please keep that date in mind, it's your night. "Old Timers" so come prepared to enjoy it to the utmost.

Till then—

Your secretary, Helen Lilley.

A Commendable Undertaking

IN THE CONSIDERATION OF world problems and the many measures by which the peace of the world may be preserved, perhaps too little attention is paid to the important part which education can play in this regard. Education is not a quick road to the solution of any problem and it is apparent that many of the present difficulties are urgent and have little connection with the slow process of learning. It should not be overlooked, however, that one avenue to lasting peace lies in building up tolerance, and understanding of world problems in the minds of the boys and girls who are now growing up.

Race Hatreds Engender War

A recent item from Great Britain tells how school children from all parts of that country met recently to learn about the problems which are now facing the world. Special emphasis was laid on the difficulties which people of all kinds have to overcome. A one-day course on international affairs was planned for them by the Council of Education in World Citizenship, a non-political body upon which there are representatives of professional teachers' associations, youth organizations, and educational authori-

British People Are Tolerant

Those children who attended the course voluntarily gave up one week of their school holidays to these studies. It may be questioned as to whether these principles of tolerance and goodwill to people of other nations, for Britain has been as free as any country in the world in its exaggerated forms of intolerance or preoccupation. The fact that such a gathering of young people that even the need for promoting international goodwill and understanding is recognized by groups such as the one which organized this gathering. Certainly nothing can be lost by fostering the broadest possible outlook among the children who are growing up today, and such efforts should be commended and encouraged wherever they may be made.

GOT A HEAD COLD? Relieve Dry, Stuffy Nose FAST!

A few drops of Vicks Va-tro-nol in each nostril work fast right where trouble is! Va-tro-nol opens up cold-congested breathing passages and relieves sneezing, sniffly head cold distress. Follow directions in package.

VICKS VA-TRO-NOL

Chinese At University Of Saskatchewa

SAKATOON.—Fuh-Hue, Mo. of the National Peking University has arrived in Saskatoon from China and will work for a year with Dr. J. B. Harrington, professor of field husbandry at the University of Saskatchewan.

He is a plant breeder and lectures on the staff of the agricultural college at Peiping. Several years ago he took his master's degree at the University of Illinois and spent one semester at Cornell. He will study cereal breeding methods with Dr. Harrington.

COOLED BY HEATING
Electro-fans increase room's temperature instead of lowering it. Body temperature being higher than the air, relief is felt when a breeze strikes it and carries away heat from the body.

OINTMENT

FUNNY And OTHERWISE

The 16-year-old kept fidgiting at the grownups' afternoon social. At last she turned to the young lady beside her, extending a small hand.

"Here's your nickel, mummy," she said. "I'd rather talk."

First shopper: "It's tough to pay 50¢ for a pound of meat."

Second shopper: "Yes, but it's even tougher when you pay 25¢."

"So your husband's in the army, Mrs. Worrit?"

"Yes, they've made him a gunner an' that's what he's been ever since I married him."

"Always been a gunner?"

"I've been a gunner since he's been a gunner to do this and 'gunner do that,' but he's never did anything worth while."

Mrs. Brown (displaying new lampshade): "Isn't it perfectly lovely? And it only cost \$3.98!"

Brown: "If you wear that to church tomorrow, you go alone!"

"I've no money on me," said the man to the bully who had waylaid him in the dark lane, "and my watch has only a sentimental value."

"Hand over," said the tough. "I feel like a good cry, anyway."

"I hear your new lodger is a very impudent fellow. Does everything in the heat of the moment."

"Yes, it's his job. He's a blacksmith."

A wealthy woman asked an assistant in a shop for instructions on how to make a dog's jacket. "How big is the dog?" asked the sales girl, but the woman's illustrations were not very helpful. "Perhaps you'd better bring the dog in," suggested the girl.

"Oh, I can't do that! It's to be a surprise for him!"

A celebrated vocalist was in a motorcar accident one day. A paper after recording the accident, added: "We are happy to state that he was able to appear the following evening in three pieces."

"Tommy," said the teacher, "can you quote a famous African proverb?" After a moment's desperation, thought, Tommy smiled. "Yes, Sir," he said brightly. "The darkies' hour is just before the dawn."

She: "Here's a story of a man out west who bartered his wife for a horse. You wouldn't swap a horse, would you darling?"

He: "Of course not (pause), but I'd hate to have anyone tempt me with a good motor car."

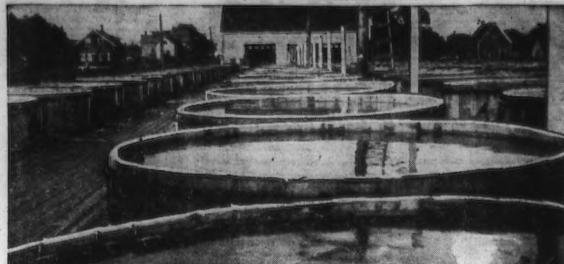

"Senator, you promised me a job."

"But there are no jobs open."

"Well, you said you'd give me one."

"Tell you what I'll do. I'll appoint a commission to investigate why there are no jobs, and can work on that."

HUGE TEST TANK
The National Physical Laboratory at Teddington, England, has a tank, 670 feet long and 30 feet wide, in which scale models of boats and ships of all sizes are tested for speed and seaworthiness.

NEW INDUSTRY—The cucumber crop in Prince Edward Island has been outstanding this year. In many districts they were grown on the acre. Mathew-Wells, well-known pickling firm in Charlottetown, has started a large-scale canning of these cucumbers. Farmers from all over the Island bring their cucumbers to Mathew-Wells, Charlottetown, the factory buys them at a price which is twice that of the very small ones. From Charlottetown the warty little vegetables are shipped to the brine processing and packing headquarters at Guelph, Ontario. First, however, they are separated according to size, and then dumped into one of the company's two hundred five-ton vats filled with brine. Here they are cured and soon are ready for shipment. A new industry has been born in Canada's smallest province. Open air vats receive the crop of cucumbers as they come from the fields; after curing in brine they are shipped for processing to Guelph, Ont.

HOG POPULATION SHOW GAINS IN WESTERN PROVINCES

Prarie farmers have not rushed back into the hog business at such a rate as their eastern competitors, although every western province shows gains in the hog population, ranging from 22 per cent in Alberta to 12.7 per cent in Manitoba, according to figures published by the Dominion Bureau of Statistics. Total hog population of Canada at June 1 numbered 5,473,200, up from 4,910,200 a year earlier. Nova Scotia, with 11.5 per cent, Saskatchewan with 22.3 and 11.5 per cent, respectively, were far ahead of the western provinces.

Part of this exaggerated rise in the prairie population is no doubt due to the federal feed-in plan which gives a price preference to eastern livestock growers. Shortage of feed throughout the country this season will probably cut the fall pig crop in spite of the feed-in plan. The bureau estimates that the increase over last year's fall crop will be less than 6.9 per cent, indicated at June 1. The spring pig crop, by contrast, was up 10.5 per cent, up from the spring of 1934. Marketing of a considerable number of sows recently gives weight to this estimate.

AN ODD REQUEST

LONDON.—Once a year a bugler will sound Taps over the grave of Harry Reginald Aldish, a war veteran who says: "Do your best for England."

Aldish's will, filed recently for probate, provided for this annual ceremony.

Iron "dark-colored" cottons, linens and all rayons on the wrong side to curb tendency of fabric to shine.

Beat This! Same Name Drawn Three Times

BURLINGAME, Calif.—There were 200,000 tickets in the big reviving lottery.

Miss S. Simonds, wife of the mayor, was chosen to pick from among them the winner of the grand prize—a washing machine—at the fall show of the Burlingame stockmen.

The first name drawn was Miss Marjorie Volkmar, 15 Park road, she was absent.

As an alternative, she was drawn: Miss Peg Volkmar, 15 Park road. She was absent.

Mrs. Simonds tried again. The name, Miss Marjorie Volkmar, 15 Park road.

Officials therupon decreed the washing machine was Marjorie's.

After Long Chase

How Royal Navy Hunted Down And Sank German Battleship Bismarck

LONDON. — The 1,750-mile chase of the German battleship Bismarck in May, 1941, and her sinking after a "long, hard fight" in which "all the odds" were described in Royal Navy dispatches published in a supplement to the London *Gazette*.

The 56,000-ton Bismarck, one of the largest battleships in the world, was hit about 500 miles off Brest after a running battle with the Royal Navy and the R.A.F. after the 42,000-ton battleship Hood was blown up.

A graphic dispatch from Admiral Sir John Tovey, Commander-in-Chief, Home Fleet, described the end of the Bismarck when she was finally cornered and pounded by the British Fleet after her attempt to break out into the Atlantic to attack Allied shipping forces.

"The Bismarck was a wreck, without a gun firing, on fire fore and after and swallowing more heavily every moment," Sir John wrote.

"Men could be seen jumping overboard, some death by drowning in the stormy sea to the appalling effects of our fire."

The Bismarck put up a most gallant fight against impossible odds, worthy of the old days of the Imperial German Navy, and she went down with her colors flying.

The dispatches showed that the first scint of the Bismarck was in early May, when increased German air reconnaissance between Iceland and Greenland suggested that a German battleship might attempt to break out from the North Sea to play havoc with Allied shipping in the Atlantic.

On May 21 two heavily-scoured warships, the Bismarck and the cruiser Prinz Eugen—ever sighted by R.A.F. planes off the coast of Norway heading northwards.

British warships were dispatched to block the way between Iceland and the Faroe Islands and to guard the North Strait between Iceland and Greenland.

On May 23 the cruisers Suffolk and Norfolk sighted the Bismarck and Prinz Eugen in the Denmark Strait steaming southwest for the Atlantic and began to shadow them. The battleship Hood and Prince of Wales closed in across the path of the advancing enemy warships.

Early on May 24 they joined battle but Bismarck's second or third salvo struck the Hood in the Head which spread rapidly.

Shortly afterwards the Hood was straddled again. "There was a huge explosion between the after funnel and the mainmast and the ship sank in three or four minutes," Sir John said.

LONDONERS HAVE ACQUIRED HABIT OF JOINING ANYTHING RESEMBLING A QUEUE

LONDON. — When a pugilist left groggy by many beatings starts swaying at a ring, some people say he is "up-happy." By the same token, Londoners are queue-happy.

Look what happened when a couple of people at an exhibition stopped to consult their catalogue. When they looked up a minute later a pair of queues had formed behind them.

The same thing has been known to happen when one member of the family slips into a store, leaving the other to wait outside. The person waiting, having had to leave the labels in the store, turned around to find himself at the head of a queue.

Most likely explanation is that people are afraid they'll miss something good if they don't tap on anything that looks like a queue. Did you ever notice how many people rarely pass a store without a thought for its contents, have been known to halt and join a queue because "they might have something nice."

But sometimes queues are downright silly, like those that formed behind 10 women who were seen waiting outside a store in soft London. Others decided to wait too, until the line extended 50 yards. Then a bus arrived and the first 10 women stepped off, leaving the others for an outing, while the others on the sidewalk looked at one another and wondered why they stopped.

Then there was the incident in a

HELPFUL HINTS

When substituting bread flour for pastry flour, measure the amount called for and then take away two level tablespoons, flour each cup.

Salt corrodes silver rapidly, and it is a good plan to remove the cap and wipe off all of the salt residue each time the shaker is used. The shaker requires frequent cleaning and should be polished often.

After you have sprayed a cupboard with DDT solution to rid it of insects, it will be safe to put the food back in approximately three to four hours. Butter and milk, especially should not be exposed to DDT.

The enemy now turned south. It was later learned that damaged in the engagement with the Hood, the Bismarck had decided to make for a French port, abandoning her attempt to break into the Atlantic.

Fearing that because of her exceptional speed the Bismarck might escape, the battle fleet could count with her, a torpedo boat attack was launched from the aircraft carrier Victorious.

A Swordfish squadron of nine aircraft, despite bad weather, scored at least one hit which, Tovey said, was very responsible for the Bismarck being finally brought to action and sunk."

Later on May 24 Prinz Eugen parted company with the battleship and early on the 25th shadowing British warships lost touch with the Bismarck.

"D-F" Locates Bismarck

After fruitless searches by aircraft and ships, D-F (direction-finding) bearings on signals picked up by the Admiralty located the Bismarck on an eastern course apparently making for the coast of Norway. Her 40,000-ton battleship Hood was blown up.

A graphic dispatch from Admiral Sir John Tovey, Commander-in-Chief, Home Fleet, described the end of the Bismarck when she was finally cornered and pounded by the British Fleet after her attempt to break out into the Atlantic to attack Allied shipping forces.

The Bismarck was a wreck, without a gun firing, on fire fore and after and swallowing more heavily every moment," Sir John wrote.

"Men could be seen jumping overboard, some death by drowning in the stormy sea to the appalling effects of our fire."

The Bismarck put up a most gallant fight against impossible odds, worthy of the old days of the Imperial German Navy, and she went down with her colors flying.

ONE OF OLDEST FAIRS—Woodstock has one of the oldest fairs in eastern Canada. Just how old it is no one seems to know, but it must be nearing the century mark. The old fair grounds, with many buildings still standing, was the training centre of thousands of drivers of motorized war equipment. This year the fair was resumed with vastly improved equipment. All livestock can be housed in permanent buildings. Dairy cattle were the important end of the livestock exhibits. The prize list attracted a good show, and the horse show was the only grandstand attraction. There was also a sheep show and a swine show. Ideal weather was a factor in a record attendance for the three days. Woodstock fair grounds, complete with converted army buildings, was revived in a big way this year. In the foreground, R. O. Biggs, Dundas, is shown placing a class of Ayrshire heifers.

NEW PRINCESS FOR SIX NATIONS INDIANS — A few moments after being adopted into the Six Nations Indians as a princess of the Mohawk tribe, radio commentator Claire Wallace of Toronto dons the dark-trimmed feathered headdress of an Indian chief. One of the few white women ever given this honor, Miss Wallace became an Indian princess with all the tribal ceremony of the Six Nations, largest Indian group in Canada. The event was a colorful feature of the annual fair on the Six Nations reserve at Ohsweken, near Brantford, Ont. Her Mohawk name—Gaw-gwan-na-rya-nee—means Princess Loud Voice Heard Over the Land.

Royalty Paid Tribute To Great Leader

When William Booth died, burned

out and blind at the age of 83, the

Lord Mayor of London walked at his

funeral. Kings and queens of Eu-

rope, as well as the President of the

United States, sent flowers for his

funeral. The Queen Mother paid a

tribute to him in her speech at the

funeral.

Big Gains In Canada's Revenue Seen

Customs And Excise Collections Show Increase Of More Than \$81,000,000

OTTAWA.—Customs and excise collections during the past six months showed an increase of more than \$81,000,000 over the same period a year ago, Revenue Minister Mc-Callum disclosed yesterday.

During the same period, he said, income tax collections declined by \$2,000,000 from the same total a year ago. Aggregate net collections for both income tax and customs and excise divisions at the end of the second quarter of the current fiscal year amounted to \$1,261,428,368 indicating a comparative increase of \$79,178,509.

During the second quarter, July, August and September of the current fiscal year, net customs and excise collections amounted to \$317,094,019 as compared with \$307,705,445 collected in the same period last year. Figures for the six month period were \$739,360,218 as compared with \$741,349,380 for the first six months of the fiscal year period.

Customs and excise revenue for the second quarter this year totalled \$276,288,110 indicating an increase of \$27,422,330 as compared with figures for the same period of 1946-47.

Aggregate collections by the same division during the first six months of this year amounted to \$522,068,150 as against \$440,900,629 for the first six months of 1946-47.

Falling Leaves Prove Change Is Inevitable

When the first leaves begin to fall they drift in through doors and windows. They shuffle along the sidewalk. They make irregular patterns on the grass.

Leaves are small bits of brown. They have neither summer's green nor autumn's brilliant tones. They slip down silently, self-effacingly, loath to draw attention to their passing. The breeze shifts them into little piles, sifting and re-settling them. Children ride away under their shelter.

Their going is strangely silent. They murmur a little when the wind rustles them and tap lightly when they fall on rooftops or against window panes. They have no message of well. Then the breeze catches them and whisks them away.

Their going is strangely silent. They murmur a little when the wind rustles them and tap lightly when they fall on rooftops or against window panes. They have no message of well. Then the breeze catches them and whisks them away.

There is pathos in these dying leaves. They mark the end of a season. They speak of the passing of time. They speak of the inability of change.

But there is strength. They strongly challenge the nostalgic to look away from the old and to turn expectant faces toward the new.—Montreal Gazette.

Commodore Liked This Simple Prayer

In the concluding chapter of his book of reminiscences, Sir James Bissett, commodore of the Canadian Steam fleet and commander of the Great Lakes, says he often read the following poem a "prayer to himself at sea":

Give me a good digestion, Lord, also something to digest,

Give me a healthy body, Lord, with strength to keep it at its best;

Give me a healthy mind, Good Lord, to keep the pure and good in sight;

Which, seeing sin is not appalled, but finds a way to set it right.

Give me a mind that is not bound, but finds not whine, whine or sigh,

Don't let me worry overmuch about that funny thing called I.

Give me a sense of humor, Lord, give me the grace to see a joke, To get some happiness out of life, and pass it on to other folk.

Life Boat Fleet

LONDON.—Britain is building a fleet of 80 new oil-burning life-boats at a cost of \$4,000,000. All are equipped with up-to-date radio and special voice amplifiers which carry sound over a third of a mile will be used.

"WELL, I'LL BE STAGGERED! AM I GOING TO WORK OR COMING HOME?"

—Moon in the Sunday Dispatch, London

**TAMPERING WITH
NATURE MIGHT
BE DANGEROUS**

Scientist Warns Against Using Atom On Weather

A scientist's warning against scientist's tendency to tamper with Nature was delivered by Prof. George E. T. Kimball, and formerly of the University of geography, McGill University, and formerly a Lieutenant-Commander working in the Royal Navy on invasion weather projects, in an address recently before the Valois Citizens' Association.

“There is no greater temptation in modern times,” he said, “to interfere with the workings of Nature. The great danger in this tendency lies in the fact that one single major act might well start a whole chain with very serious consequences.”

“It is suggested,” he suggested

that by the use of atomic power, or the heat generated in the operations of an atomic pile, it might be possible to raise the temperature of the water in Hudson's Bay sufficiently to melt the ice which covers much of the Northern Hemisphere.

“Such a feat as raising the temperature of the water in Hudson's Bay is probably not beyond scientific possibility but let us think for a moment what might be its consequences.”

The average mean temperature in the Montreal area might be raised 10 degrees. So far, so good. But that is not all. The warmer air, generated by the heat-raising operations in Hudson's Bay, would have about twice the moisture-carrying capacity.

“This means that we would receive twice as much snow. Now this might not be very serious right in Montreal but go a little further north. There could very well be snow there that it would not melt until the summer.”

“This means, my friends, the return of the Ice Age. Something which most of us do not want. For this reason I say that we should not tamper with Nature, but rather go to great efforts to alter the weather of nations or continents. Let us give a thought to the possible consequences.”

COSTLY MISTAKE

PETERBOROUGH, Ont.—Building a house on someone else's property can be an expensive mistake. E. J. Waldron bought a lot and on completion of his house found he had built on three lots belonging to an estate. The estate let him keep the lot, providing he bought the other two.

A bolt of lightning is one mile away for each five seconds that elapse between the lightning flash and the crash of thunder that follows.

FIND GERMAN GIRL IN WOODEN BOX—Curled up in a wooden box was Doris von Knobloch, a 21-year-old German girl. A U.S. soldier in Frankfurt, Germany, had left the box at an airline terminal for shipment to a New York city address. Officials, after finding the girl in the box, said that she would have frozen to death in the plane's freight compartment if she had been shipped. She said she wanted to go to the U.S. to marry her fiance.

RESULT OF SCIENTIFIC DISCOVERIES IS DEFINITELY SEEN IN LONGER LIFE SPAN

One of the large life insurance companies reports that the death rate among its policy holders dropped to a record low during the first half of the present year. This tendency states the Brockville Recorder and Times, which has continued for some years. It is the result of a steady aging of our population which carries with it the necessity of making provision for the care and maintenance of our older people, now much more numerous than they used to be.

All the advances made in medicine and surgery in the field of prevention and cure all the discoveries that have taken place within the last two or three decades, all the emphasis that has been placed on public health, are beginning to pay dividends in reducing mortality and a prolongation of human life.

From forever, it is the day when underwriters had special small hearings for the accommodation of the large number of children who died annually and also gone is the day when the man or woman in his sixties or seventies were considered old. Today, he or she has to be in the eighties or nineties to reach that classification and even then some of our octogenarians and nonagenarians are remarkably spry and active. Two or three decades hence it may be that one will have to be over the age of a hundred to be regarded as old.

Our older cemeteries are filled with small headstones erected to small children who, the records show, died of diseases like diphtheria, whooping cough and diphtheria which we have since learned to control. These afternoons, many others to young people in the teens or twenties who succumbed to tuberculosis, another disease that has lost its terrors if it still occurs in far too many instances. The records of older cemeteries continually refer

ing a bicycle, one of his favorite “constitutional” exercises. He estimates the new position would give him more time with his family, (right), as his mayoral duties have kept him busy too many hours each day to devote much attention to his home life.

CHURCHILL KNOWS VALUE OF COURTESY

People And Countries Like To Be Thanked

The Peterborough Examiner says: “Thank You is not the least important of a statesman's accomplishments. Winston Churchill is a master in this respect. In a recent speech in which he referred to Britain's critical situation, he reminded his hearers that ‘duty represents the toil and skill and self-denial of scores of millions of American wage-earners who are contributing to their own free will, in most cases, the time and hope of repayment to their fellow men in misfortune across the ocean.’ So far as we know Churchill is the only man who has had the courtesy to thank the ordinary American taxpayer for what he is doing, through his government, for the welfare of the millions which the U.S.A. is spending come from the taxpayer.

It is easy to forget to thank men for benefactions; they have so much money, that we are apt to think that they are doing their duty to pay and pay and pay. It is the same with rich countries. But everybody likes to be thanked. Thanks are the exchequer of the poor, as Shakespeare says, but thanks from Churchill have a golden ring.

Billions Invested In Canadian Farms

Capital investment in Canadian farms in 1946 amounted to \$5,922,347,000, more than 38 per cent above the figure recorded by the 1941 census, according to the Quarterly Bulletin of Agricultural Statistics for April-June 1947. The investment includes land and buildings, implements and equipment, including motor trucks and automobiles—and livestock, including poultry and animals.

The estimated value of farm capital in 1946 was almost seven per cent higher than the figure for 1945, but nearly 50 per cent of it can be attributed to the enhanced value of land and buildings. Higher prices for livestock, which more than offset a decrease in numbers, and substantial increases in the value of farm equipment in 1946.

ISLAND IS BEAUTIFUL

The Island of Jamaica, lying in the Caribbean Sea, was discovered by Columbus in 1494. It is mountainous and of great beauty, taking its name from the native “Kaimay” meaning “well wooded and watered.” The people who hard to raise average 5000 damages and agreed that “cows have tremendous appetites.” Both our food conservation program and the European self-help program might be made considerably more difficult if the Jordan cow strayed again.

Prickly pear is a species of cactus edible to man and is eaten by coyotes, foxes and other desert animals.

Autumn Travel In Canada's National Parks

Many Organizations Switching Conventions To Fall And Spring Seasons

Autumn is the season when the national parks is growing in popularity. Nearly 113,000 visitors entered the park gates during September, an increase of several thousands over the same month last year, according to figures released by the Department of Mines and Resources.

In many respects autumn is the most delightful season of the year for travel in the national parks, and it is evident that increasing numbers of Canadians who can conveniently arrange their vacation time are choosing this time of the year to visit the parks. There were also more American visitors at several of the parks than during the same period last year.

Many organizations which ordinarily held their conventions during the busy summer months are now planning to have these meetings either in the spring or in the autumn seasons when transportation and catering facilities are not so overburdened. It is to be hoped that this development will eventually be extended to the national parks which have become popular convention centres.

One of the chief topics discussed at the recent Dominion-Provincial Tourist Conference in Ottawa, was the lengthening of the travel season in Canada so that visitors could enjoy the lovely autumn and this winter wonderland of beauty. There was general agreement that this would be a desirable development from many standpoints and of great value to the Canadian tourist industry as a whole. It would necessitate of course, keeping hotels, bungalow camps and other tourist facilities open during the winter months, but this would be an obvious development if the volume of business warranted such action on the part of those catering to the travelling public.

Autumn is also one of the best times of the year to see the wild animals which are one of the main attractions in the parks. Big game down to the park highways, enabling many a visitor to enjoy his surroundings with “shots of wild animals” behaviour in a natural manner, unafraid of the hunter's rifle. To the visitor who revels in color photography, this is the season of his dreams. After the first light of day, the deer and moose, which form a large part of the forest cover in many of the parks, don their mantle of brilliant hues, and are at once a delight and an inspiration. The magic spell of the Canadian landscape, in autumn, is incomparable.

The moose, the angler, the trail rider, the hiker, the ornithologist and the nature lover, this is the most fascinating period of the whole year in the woods or on the park ways. It is one in every way to go to at least one of the parks, including the “Indian Summer,” which will coincide with the autumn vacation. It will be a thrill that will be long remembered and very different from anything he has previously enjoyed in the way of a holiday out of doors.

Sensible To Use Health Safeguards

Although disease is less likely to strike the healthy person, more than ever in poor condition, more than ever good health is needed to be quite sure of safety at all times. Medical authorities advise, particularly, that the extra protection afforded by inoculation, vaccination, or the taking of a preventive medicine be afforded to children. It is suggested that family doctors be consulted about the advisability of giving the youngsters all the special scientific safeguards—just in case.

NOT SAME WAVE

Storms that cause static near a radio transmitting station do not affect distant receiving sets; the static does not ride in on the same wave that brings the program.

TAXIES TO SAFETY AFTER FORCED LANDING—A transfer in the rough Atlantic was weathered by 68 persons when a Boeing Flying boat made a forced landing 1,400 miles west of Shannon, Eire, and then taxied safely to a U.S. weather ship, to which the passengers were moved. Here, a Boeing clipper taxis to a landing.

World News In Pictures

'LIFE-SAVERS' — Saving lives with his home-made iron lung and emergency lung equipment, has not brought Robert Hulme, of Montreal, money, but he has saved the lives of many grateful people. By revolutionising respiratory equipment 20 years ago, Hulme has prolonged the lives of over 9,000 fire and accident victims.

MONTREAL YOUTH DIES IN FREAK ACCIDENT — Standing on a mooring post at Cornwall when a ship was being lowered, Fred Weeks of Montreal fell into space under the jib, indicated by cross, and was killed when it fell back. Victim of freak accident, Fred Weeks, 17, is pictured with a friend.

STANDING ON A MOORING POST — Standing on a mooring post at Cornwall when a ship was being lowered, Fred Weeks of Montreal fell into space under the jib, indicated by cross, and was killed when it fell back. Victim of freak accident, Fred Weeks, 17, is pictured with a friend.

DIPHTHERIA QUARANTINE IS LIFTED IN JAMES BAY AREA — An outbreak of diphtheria at Moose Factory, Ont., resulted in quarantine, but did not stop U.S. and Canadian hunters from arriving in droves for moose hunting. The quarantine has been lifted. Government physician for eight years at Moose Factory, Dr. T. J. Orford, shown here with wife and children, Judi, nine, and Elizabeth, six, left two days before quarantine, but offered to return if needed to help battle dread out-break which is abating now.

CHRISTENS NEW SHIP AT ESKIMALM — Mrs. Lionel Chevrier, wife of Canada's minister of transport, christens the C.N. steamship Prince George, first passenger ship built in Canada in 25 years, at Esquimalt.

RECEIVES MEDAL — A well deserved honor came to a little known public official when Dr. C. A. Mitchell, Dominion Animal Pathologist, (left), received the Medal of Freedom from the United States at the hands of Hon. Ray Atherton, (right), recently at Ottawa. The citation mentions that Dr. Mitchell rendered outstanding meritorious service of the joint U.S. Canadian commission from 1942 to 1946. The Medal of Freedom is a U.S. decoration which ranks with their Legion of Merit, but is given only to civilians.

SHE'S NOT SUPERSTITIOUS — Black cats are jail friends of Patrick Schmidt in her cell in Cuba. She is on trial for fatal shooting of John Lester Mee, Chicago, aboard his yacht at Havana, Cuba.

MAKING FRIENDS — THE EASY WAY — Patricia Ann Beamish, 15-months-old Ottawa youngster, looks a bit dubious about the whole thing, but "Little Joe" soon made friends, brought child paper, string to play with.

CASE DISMISSED AGAINST BOYS ENTERING 'LOCKED' PLAYGROUND — Parents and children at Hamilton, Ont., leave juvenile court after charges of trespass on a city playground "officially closed" were dismissed. Older boys in senior court had charges dismissed. Looking through chained gate at Hamilton playground is one of the boys who holds his football. Court said children could play in the grounds if they get the key.

HEAD-ON COLLISION, BUT TRAIN CREWS ESCAPE INJURY — Train crews escape without injury when two C.P.R. trains collided head-on near Rutter, Ont., about 40 miles from Sudbury. Railway officials said the southbound train was carrying coal from Britt and the other was a work train running as an extra. Seven cars were derailed and both locomotives were damaged, one badly, when they upset.

ARABS' WORLD PREPARES TO ACT ON PALESTINE PARTITION — Ready to invade if Britain withdraws and Jews "lift a finger," troops of five Arab nations, Syria, Lebanon, Transjordan, Saudi Arabia, Egypt, are reported converging on Palestine. Other Arab nations with armies which bring total forces to 250,000 men are Yemen, Iraq. This is cavalry unit of Egyptian forces said preparing to move into Sinai desert.

BLAMES WRAPPERS, CURLERS FOR DIVORCE — Actress Adele Jergens has the high American divorce rate all figured out. She blames the situation on sloppy wrappers. Her husband loses hours with their wives in showers and curlers to find girls in their offices in smart suits and tidy hair-dos, claims Miss Jergens.

CANDIDATE — Chang Ying, Vancouver's unofficial Chinatown mayor, is one of the candidates nominated at the Chinese Nationalist League of Canada, for election to China's parliament.

A SPLENDID TYPE of Canadian-bred Clydesdale, this colt is Winsome Strathore, by Western Winlot, and out of Strathore Belle. Bred by P. G. Morrison, Lacoste, this handsome stallion is pictured by the photographer on the farm of his present owner, Wm. Fleming and Sons, Red Deer, Alta.

OUR COMPLETE SHORT STORY—

Epitaph And The Sirens

EPITAPH JONES closed the door of the crazy old cabin with a sounding bang. He gave the house a malignant look before he turned and stamped noisily off the sagging porch. He squared his shoulders, set his gaunt cap at a jaunty angle, and moved off toward the not-far-distant town.

The path that Mr. Jones followed meandered irresolutely across a wild expanse of black and gray ash heaps. Piles of tin cans glittered in a watery sunbeam; grimy children and boys gazed about him. A chilling wind added nothing to the bleak landscape.

Though he looked a care-free figure, Epitaph's thoughts were acutely painful. "A weepin' woman. Always a-weepin'. Livin' in luxry, a lovin' man, all the work she can do and still have time. Now, I go on watchin' her weepin' long as I gotta, and some real machine somethin' quick."

As though drawn by a magnet, his feet climbed a steep street, passed a pawn hall, a fruit market, barber shop, a pawn shop. He turned into a sun-dappled grotto where a neat yard where red tulips set on great gray stumps waited their summer cargo of flowers. Gaily painted rocks outlined the path that led to a bright blue door in a small brown house. Even the warm sunlight seemed lighter here.

Epitaph's knock was answered by a trim young woman who greeted him with a pleased laugh.

"Why, how-de-do, Mr. Jones, I was just sayin' to myself I wished that Mr. Jones would drop along and have a come promisin' in. Do have this easy chair, Mr. Jones, and lemme take your hat."

Mr. Jones relaxed into an imitation swiveling chair and looked about the room. White curtains, yellow flowers, brightly painted furniture and scarlet geraniums in the window made a delightful picture to a man lately accustomed to a house suited to a Niobe.

And the entrancing being beside him in the rose-colored dress, lips like a rosebud, eyes like a rose, a charming laugh bubbled out at his lightest remark—surely, she was a veritable beam of sunshine in a cloudy world. No gloom. No tears. Just laughter and light and loveliness.

Relieve Miserie of
HEAD AND
CHEST COLDS
while children sleep

When colds strike, rub throat, chest and back at night with THERMOGENE RUB. Soothing medicinal vapours penetrate upper breathing passages—start right away to break up congestion, soothe irritation, quiet coughing. Comforts aching muscles like a warm sunbeam. Try it! You'll agree that THERMOGENE RUB is a real blessing! Write for free introductory tin now to DEPT-MB#7 296 Richmond St. W., Toronto.

THERMOGENE RUB

Lemon Pie-m-m-m!

Soon it's delicious, when you make it with Canada Corn Starch and it will be a favourite with the whole family.

The quality of Canada Corn Starch is the reason for its popularity with housewives from Coast to Coast. When your recipe calls for Corn Starch be sure to use Canada Corn Starch, its dependable quality ensures excellent results.

Why The Farmer Only?

John Bracken, national leader of the Progressive Conservative party has in his many speeches raised one point to which we would like to hear a government reply.

The point Mr. Bracken makes is "why does Canada have to make such a grandiose gesture to Britain in the form of cheap wheat an all at the expense of the farmer?" shdrlushdrushld rabid Liberal and supporter of the government will have to admit that this is an honest question.

To us the question seems to have come from the A.F.U. resolutions of last year. These resolutions may have been a little short of the mark but certainly the question asked by Mr. Bracken hits the bulls-eye.

It has been explained over and over again by government leaders and followers that before the 5 year contract with Britain is terminated the price to be paid to Canadian farmers for the final period will probably more than offset the difference in price between the contract and the world price during the initial period of the contract. This may farmers under the British Wheat Agreeable in theory but the return to reement is not justified when compared with the loss in revenue to farmers if they had been allowed to sell their wheat on the open world market.

We are not arguing against the British Wheat agreement, we are trying to point out that the fine and noble gesture on the part of our government is to be made by one section and one section only, the wheat farmer. He is temporarily the only one out of pocket on the deal.

There are many farmers as well as ourselves who consider the guaranteed price on wheat to farmers to be a sound principle for it guarantees the stability of the wheat farmer if such a guarantee is possible when nature is consider-

ed. On the other hand it calls upon this one group to at present make the whole donation towards the stability of farming generally.

The Gazette has always been inclined to feel that sooner or later we will be told that another billion dollar loan has been made to Britain. This we think will come in the form of an announcement that the wheat deal with Britain is to be paid out of the Dominion treasury. If such becomes the case, the contribution made by the many millions of Canadians in the form of income tax will undoubtedly make up part of the deficit to the farmer but certainly not all. The question still remains why all the burden on the farmer? Why not on the Canadian mining industry, the oil industry or even better why not on the not on the Canadian Pulp and Paper industry in which Canada has become the recognized world leader. Oh no, it is the farmer who again gets it in the chin. He fights on and on but always he is behind the eight ball.

In this corner we have the Canadian Wheat Farmer and in that corner the world price of wheat. Somebody is getting a trimming and it isn't the world price of wheat.

Tax Equation Nearer

The appointment by the Alberta government of any tax commission must be considered as an acknowledgement on the part of that body that there is something wrong with the present system of taxation in this province. We agree with them that there is. The ability of a person to pay taxes depends on his earning power. Most of us are at the limit of this earning power but there seems to be no limit on the amount of taxes that we are called on to pay. The Federal government recognized its responsibility when it attempted to make tax agreements with the provinces. Now the province recognizes its responsibility and has appointed a tax commission. The equation between governments is now closer to a solution when nature is consider-

ed and the we can be happier for it.

Small Husky building. This drill hall is to be known as the Mechanics Building and will house the future Engineering and Building Construction classes attending the school. If things go as planned it may be that present classes will be using it by spring. The foundations are in and occupy all the space, whereupon you will be seated. This will be used as the swimming tank. The roof trusses for the building are arriving daily at the school from the Bowden airport, with the exception of one. A truck and trailer move on trusses from Bowden airport to Olds. Since the roof trusses are being moved intact it means that the trailer follows the truck and is not completed. The building when completed will be approximately 110 ft. wide and 150 feet long. There are 11 roof trusses in all supporting the roof. The idea of incorporating a swimming tank in the hall is also receiving favorable consideration. It

is felt that in case of fire the quantity of water as supplied by the water tower would be insufficient in which case the swimming pool would supply the necessary reserve.

To those of you whose memories of shop classes are generally sprinkled with recollections of warmers over projects, benches, clamps, glue, hammer, other students, machines, paint and miscellaneous in an effort to find a quiet place to assemble your project all the floor space provided in this new shop building would seem like a dream come true. Plans for the disposal of the old shop are not completed but eventually part of the interior will likely be two storeys and thereby allow more classroom for some of the different classes that now in the new building are

The skating rink has been located behind the dormitory where

students can obtain the maximum benefit from it. The lights and the rink house are all in order waiting for the weatherman to drop the handkerchief so that flooding can commence.

The residences on the campus have been stuccoed and insulated this year as part of the improvement policy to be carried on for the coming year. Next year the main building is to be painted so the old familiar exterior markings will soon be gone. As part of the improvement policy, it is hoped that a central heating system will be installed to care for the heating needs of the various buildings.

Seed Showmanship

Western Canada has established over the years a world-wide reputation in the production of high quality grain of all kinds. Let us however emphasize that it should be noted that these laurels have not been won without considerable effort.

Seed shows, large and small, national and international, are recognized as an excellent means of stimulating an active interest in good seed and crop improvement. Shows of this kind have a definite advertising and educational value. Crops which should be encouraged are those which exhibit a competitive spirit, as well as the urge to improve, is developed.

The Ideal Exhibit. Many farmers, at this season of the year, begin to plan exhibits for seed shows. To the experienced exhibitor, it means many hours spent in careful preparation. The ideal exhibit consists of kernels typical of the variety, and as nearly alike as possible in size, shape and colour. The whole sample should present a good, clean, lasting appearance. It should be free of all weed, foreign material and other impurities. All evidence of seed-borne disease or unsoundness (weathering, machine damage, sprouting, etc.) should be avoided.

Assistance Offered. This year the Western Provinces are making a special effort to have a large and representative group of exhibits at the Royal Seed Show, Toronto. The Provincial Department of Agriculture will pay the shipping costs to and from Toronto on approved exhibits. In addition certain provinces will supplement the prize money won by successful exhibitors. Provincial exhibitors will be assisted by their Provincial Department of Agriculture, for prize lists and further information.

Remember, then, the Royal Seed Show is being held at Toronto, with entries closing October 21st, at the International Fair and Grain Show at Chicago, with entries closing November 10th.

A large entry of carefully prepared exhibits will help to publicize Western Canada's reputation for the production of high quality seed of all kinds.

Seed Testing

Knowing that good seed will be scarce by spring, Alberta farmers are making sure of their supplies now. In this connection, there is one point that should not be overlooked, the germination test.

J. B. Birdsall, supervisor of crop improvement for the provincial department of agriculture, says that the germination test always advisable is more important than ever this year. Whether the seed is from your own field, from those of a neighbour or from a seed house, you are advised to make sure that it will germinate properly. You can test the seed at home, take advantage of the seed testing service offered by the provincial department, or send a one pound sample to the Plants Product Division, Dominion Department of Agriculture at Calgary.

It is a good idea to have a few of the samples prepared by the Plants Products Division for making the test, but these are the only tests carried out which are recognized for the sale of seed on grade.

Germination is the first test for determining germination ability of a sample to be used by the grower.

FARMERS URGED TO USE MONTCALM BARLEY

Farmers wishing Montcalm barley for their use should send a sample to the Barley Improvement Institute, sponsored by the Brewing and Malting Industries. It is a probably known, it may be anticipated that unless Montcalm is obtained promptly, there may be difficulties or inconveniences in getting adequate supplies later on. Farmers are asked to contact their nearest Montcalm

grower, their local agricultural representative or the field crop commissioners of their provincial department of agriculture.

It is very likely that one of four eligible in the \$25,000 National Barley Contest of 1946 and 1947 also sponsored by the brewing and malting industries. It is now established that the best two varieties of malting barley equal if not superior to the well-known O.A.C. 21. This year it has been grown in Western Canada to satisfactory yields. Present prospects are that it may prove to be the best high quality malting barley.

The Religious Education Council of Alberta is happy to announce that Rev. Mrs. Jean Cox as Children's Work Secretary for the Province of Alberta, Miss Cox will be promoting religious education among the beginner, primary and junior age groups throughout the province.

She is a graduate deaconess of Wycliffe College in Toronto and has studied at United College in Winnipeg. Miss Cox has also completed courses in psychology at St. George's School in Toronto and at the National College of Edu-

cation at Evanston, Ill.

M. E. Cook, M.L.A., of Olds and Montcalm, M.L.A. of Red Deer riding will address the inauguration of the City Social Credit Constitution to be held in the Parish hall on Thursday, November 20th it was announced by officials of the City constituency.

The convention always draws a large crowd of members and it is hoped that this year will be no exception. It is an opportunity for all citizens to hear their representatives first hand and discuss with them any problem they may have.

You raised it...
NOW BENEFIT BY
UGG. FARMER OWNED
MARKETING FACILITIES

Here, in these heads of grain, is represented a whole year's planning... a year's investment in money, time and labor. Increase the dividends from your investment now: USE THE FACILITIES OF UNITED GRAIN GROWERS LIMITED TO MARKET YOUR GRAIN.

Every bushel delivered to Canada's farmer owned co-operative is marketed at cost... every bushel adds to your share of surplus earnings.

Did You Pay Income Tax For 1942?

If so, read this carefully!

The Government of Canada will repay the REFUNDABLE SAVINGS PORTION of 1942 Income Tax by March 31, 1948. If you are one of those who have refundable savings a cheque will be mailed to you BUT—

Your correct present address is essential!

Correct addresses are available for most of those entitled to repayment, but a large number of taxpayers are constantly moving and others marry and their names change.

Cards on which to report changes of address or name are being sent to all householders in Canada. These are being distributed at the present time. Additional cards are available either at your district Income Tax office or your local Post Office. Do nothing if you live at the same address and have the same name as in 1942.

If you are entitled to Refundable Savings on 1942 Income Tax and you have changed your address or name
COMPLETE AND MAIL YOUR CARD AT ONCE!

Hon. James J. McCann
Minister of National Revenue

Many Changes On O.S.A. Grounds

There is a distraction in the even tenor of life at O.S.A. today centred in the neighborhood of the shops and Annex Husky building. None can ignore it and it is largely enough nobody cares to. In fact all seem to welcome the diversion caused by it, probably with visions of what is to take shape in the future.

Old O.S.A. has decided to grow, not only in any slow, steady or barely perceptible manner but in one healthy burst. This expansion will be seen itself in the form of an Air Force field being erected on the O.S.A. campus beside the shops and beside the Annex.

Over \$300,000,000 to be repaid the public

THE DOMINION GOVERNMENT IS REDEEMING 15 MAY,
1940 ISSUE OF WAR SAVINGS CERTIFICATES
COMMENCING 15 NOVEMBER

Save this money. Start a Savings Account with your nearest branch of
The Canadian Bank of Commerce.

You can add to it on the 15th of each month as the Government
redeems each succeeding issue of these War Savings Certificates. This Bank
welcomes you as a
customer.
